

### **What is a Nursing Professional Practice Model (PPM)? Why is it important?**

A narrative cannot duplicate the understanding of an image. Professional Practice Models provide a visual representation of nursing's contribution in an organization. Developed by UVA nurses, our model includes values and goals that define the professional nursing identity. It captures the professional elements and relationships that define the complex role of the nurse.

### **The UVA Professional Practice Model:**

Serving as the anchor for the model is our quality star. Encircling the star are words that represent our care delivery system, Relationship-based Care. This system identifies the three relationships at the core of the patient experience: the nurses' relationship to self, to colleagues and to patients and families.

These elements partner perfectly with the organizational goals and the organizational values represented in ASPIRE.
